

## ABOUT US

### TWENTY YEARS EXCELLENCE IN THE APPAREL INDUSTRY

Polaris was founded in 1992 by Richard Slomka to serve our customers in placing and producing garments in Eastern Europe. Polaris quickly evolved from an agent setup to a fully integrated service, manufacturing and trading company operating worldwide with production throughout Europe and Asia.

Today we serve customers in Europe and in North America, delivering custom turn-key solutions specifically tailored to the needs of each customer and providing state of the art services and excellent production quality.

Our head office for finance and administration is located in Vienna, Austria. Furthermore Polaris has offices throughout Europe and Asia supporting the sales and operational parts of our enterprise.

### DESIGN & DEVELOPMENT

Employing more than 2000 people worldwide not only is Polaris a leader in manufacturing but also excels in design and development. With our own sampling studios and design centers in Europe and Asia, we are able to create complete collections from development to the final product.

Our team of highly trained technicians can develop patterns from a simple designer's sketch. Our merchandising teams will source fabric and trims to create your show room and fit samples in our own development facilities to your full satisfaction.

### PRODUCTION & QUALITY ASSURANCE

We know and understand the importance of quality and perfect timing at a competitive price. Our customers worldwide trust our services, our production control and final goods inspection. During the complete production process, from fabric inspection to final product, our international quality control experts constantly monitor your goods to assure that you only receive immaculate merchandise.

### FINANCE & LOGISTICS

Providing turn-key solutions for our customers is an integral part of our company. We are here to offer you complete financing and logistics solutions. Name us the goods you wish to receive and the date you want to have them in your distribution center - Polaris will make it possible!
